VITAL CYBER

# Managed Endpoint Protection

MCNC's Managed Endpoint Protection service is built to solve your toughest cybersecurity challenges.

**24/7/365**
PROTECTION

**FULLY MANAGED**
NOT JUST A FLASHING LIGHT

**DETECT**
**INVESTIGATE**
**RESPOND**

**MCNC's Managed Endpoint Protection service combines the cloud, next-gen antivirus, and advanced AI, backed by MCNC's team of cyber experts and in collaboration with global cybersecurity leader CrowdStrike®. As a technology leader with a pulse on North Carolina's most critical organizations, we created this service to better serve our clients and their unique needs.**

### FULLY MANAGED
Streamline cybersecurity with MCNC's 24/7/365 service, powered by CrowdStrike's industry-leading platform.

### HIGH-VOLUME CAPACITY
Process, correlate, and analyze more than 5 trillion security events per week.

### ENHANCED DETECTION & PROTECTION
Investigate petabytes of historical data and leverage capabilities that far exceed what other existing analysis platforms offer.

### EASY TO OPERATE
Consolidate systems into a single lightweight agent that's simpler to manage.

### PLATFORM AND DEVICE AGNOSTIC
Protect endpoints across all operating platforms, VMware, VDI endpoints, data center servers, virtual machines, and cloud platforms.

### LOWER TOTAL COST OF OWNERSHIP
Save with zero hardware or footprint requirements, and no maintenance or lifecycle management costs.

MANAGED ENDPOINT PROTECTION

# Get Immediate Visibility, Detection, and Prevention

**MCNC's Managed Endpoint Protection service is powered by CrowdStrike's Falcon Platform that continuously ingests and contextualizes real-time analytics by correlating across trillions of events. With this platform we can investigate and hunt for threats happening in your environment and accelerate the response time.**

**CrowdStrike is recognized as a Leader and the top-placing security vendor for Completeness of Vision in Gartner's 2021 Magic Quadrant for Endpoint Protection Platforms.**

CROWDSTRIKE

| SOLUTION | CAPABILITIES | BENEFITS |
|---|---|---|
| **Prevent** | • Machine learning<br>• Block known bad<br>• Exploit and Indicators of Attack behavioral blocking | • Improved protection, and security efficiency/efficacy<br>• Reduced number of incidents and system complexity<br>• Enhanced user productivity |
| **Insight** | • Real-time and historical search<br>• Threat hunting<br>• Real-time response and containment | • Reduced risk, response and remediation times<br>• Improved SOC productivity<br>• Enhanced security efficiency and efficacy |
| **Discover** | • Asset and firmware inventory<br>• Privileged account monitoring<br>• Application usage | • Reduced endpoint inspection and licensing costs<br>• Eliminated burden of unmanaged assets<br>• Minimized risk from rogue users/apps/systems |
| **Spotlight** | • Scanless technology<br>• Visibility from OS to BIOS, On- and Off-prem<br>• Integrated threat and vulnerability workflows | • Eliminated vulnerability scanning and blind spots<br>• Improved security posture and zero impact<br>• Enhanced timely knowledge available on demand |
| **OverWatch** | • 24/7 proactive threat hunting service<br>• Actionable alerts via console and email<br>• Guided response and prioritization | • Added expertise and vigilance that's always on<br>• Augmented detection of hidden and sophisticated threats<br>• Reduced dwell time and alert fatigue |
