Data Center Solutions

MCNC®

5,000+

Square feet with over 175 cabinets

10+Gbps

Redundant network connections

N+1

Redundant UPS and cooling

24x7x365

Securely monitored and accessible

MCNC's portfolio of Data Center solutions provides community anchor institutions with an off-site secure facility to deliver services and keep data safe in the event of a disaster, emergency, or sudden power loss.

▶ Why Data Center from MCNC?

Data centers are located in RTP and Rosman, North Carolina.

The RTP facility is available to provide colocation, data backup and recovery, managed hosting, and virtual machines services.

Both data centers are securely monitored and provide 24x7x365 access.

The RTP data center is a Tier 3 facility, which provides dual-power and multiple 10 Gig uplinks.

"

Highly reliable service with great customer service and support.
